

Catheter/Delivery System Design

What We Offer

Engineering

- Prototyping & Proof of Concept
- Product & Process Development
- Local Drug Delivery & Drug Coated Balloons
- Turn Key Solutions, from idea to regular approval

Manufacturing

- High Volume & Low Volume
- OEM/PLM
- Catheters & Delivery Devices
- Balloons & drug coating of Balloons
- Crimping of Stents, Packaging & Labeling

Quality & Regulatory Affairs

- Made in Germany
- Clean Rooms ISO Class 7 and GMP Class C
- ISO 13485 and GMP Guidelines
- CE & 510k Approval

Medical Fields

- Interventional Cardiology & Radiology
- Interventional Neuroradiology & Urology
- Structural Heart Disease
- Ear, Nose and Throat

Innovations

Transseptal Puncture Device

The transseptal puncture device is an enabling technology that allows a safe, accurate, and controlled transseptal puncture from the right to the left atrium.

The Cutting Catheter

The cutting catheter is a percutaneous device for scoring diseased aortic valves as a non-occlusive preparatory step for percutaneous aortic valve replacement.

Needle Injection Catheter

The needle injection catheter is used for the injection of agents or stem cells into the myocardium.

About Lubrizol Life Science Health - The Health business team partners with customers to speed their innovative medical devices and differentiated pharmaceutical products to market. Our dedicated team provides best-in-class polymers and excipients, along with state-of-the-art product design, development, and manufacturing services, with the ultimate goal of creating solutions that improve patient outcomes.
